PROFESSIONAL SUMMARY

Principal Product Manager with 6+ years of experience across cloud infrastructure, partner ecosystems, and enterprise go-to-market strategy at Oracle (OCI) and Cisco. Skilled at translating ambiguous technical problems into structured product roadmaps, then leading cross-functional teams to ship. Known for establishing repeatable frameworks rather than one-time solutions. Consistent track record of business impact: enabling \$450M+ revenue initiatives at Cisco, enabling 50+ enterprise cloud deals at Oracle, and eliminating first-year credit forfeiture across 10+ customer accounts through a structured onboarding program.

CORE COMPETENCIES

Product and Strategy: Product Roadmapping, KPI Definition, Go-to-Market Strategy, MVP Scoping, Pricing and Packaging

Cloud and Technical: Oracle Cloud Infrastructure (OCI), AWS, Dedicated and Sovereign Cloud, Partner Ecosystems, API and Platform Products, Data and AI Products

Execution and Analytics: Financial Modeling, Deal Structuring, Customer Onboarding, Sales Enablement, Data-Driven Planning

Tools and Methods: Figma, Agile, Stakeholder Management, User Research, Cross-Functional Team Leadership

PROFESSIONAL EXPERIENCE

Principal Product Manager | Oracle Cloud Infrastructure (OCI) | Livermore, CA *Mar 2024 - Mar 2026*

- **Led an 8-person cross-functional team** (TPM, solutions architect, 5 engineers, and a designer) to design and build the OCI Dedicated Cloud self-service platform, a net-new internal product with no prior equivalent at Oracle.
- **Defined product vision and multi-quarter roadmap from zero** for the self-service platform, spanning customer qualification through provisioning, with a projected reduction in end-to-end deployment time from roughly 200 days to 50 days as the core business case.
- **Drove the Alloy Cost Estimator from concept to limited availability** by identifying existing code that could be reused rather than built from scratch, delivering the first customer deployment with a configure-price-quote workflow roughly 10x faster than prior manual processes.
- **Launched the Dedicated Cloud Onboarding Program** for enterprise customers, eliminating first-year cloud credit forfeiture across 10+ accounts and improving early-stage adoption for customers new to dedicated cloud infrastructure.
- **Developed the Database Recovery Service sizing framework** now used as the standard for scoping customer deployments, reducing estimation inconsistency across sales and technical teams.

Product Manager | Oracle Cloud Infrastructure (OCI) | Livermore, CA *Oct 2022 - Mar 2024*

- **Owned the OCI Alloy Partner Program track on Oracle Partner Network**, establishing the structure, readiness criteria, and enablement materials that brought the first partners to market ahead of Dedicated Cloud GA launch.
- **Managed the product roadmap for capacity management tooling** across compute, storage, and database services, shipping an MVP focused on accelerating expansion of existing dedicated cloud deployments.
- **Served as the primary lead for footprint sizing and capacity requirements** across enterprise cloud deals, engaging directly with Finance and technical teams to model customer infrastructure needs and validate deal viability.
- **Oversaw high-profile government cloud deployments**, including infrastructure planning for national-scale digital election events, with no service disruption across the engagements.

Product Manager, Customer Experience | Cisco | San Jose/Pleasanton, CA *Mar 2020 - Oct 2022*

- **Redesigned the value proposition and incentive structure for support services**, producing a sales enablement program that drove 111% year-over-year growth, roughly \$30M in additional ACV.
- **Shaped product strategy for embedded support services across Cisco hardware and software lines**, developing the business case for a portfolio shift projected to generate \$450M in incremental revenue.
- **Contributed to a \$1B support business transformation** that moved Cisco from a perpetual hardware-centric model to a recurring software subscription structure, navigating the commercial transition as both hardware and subscription ramps stabilized.

Business Operations Manager | Cisco | San Jose/Pleasanton, CA Jan 2019 - Mar 2020

- **Owned financial planning and booking strategy for the Cisco Security Services business**, developing bottom-up models in close partnership with Finance, Sales, and Delivery leadership.
- **Delivered executive-level reporting in support of CFO planning cycles**, converting operational data into KPI dashboards and strategic recommendations used by senior leadership.

EARLIER EXPERIENCE

Cisco (Senior Business Analyst, Business Analyst, Jan 2016 - Jan 2019)

- **Advanced a \$2B+ services business at Cisco** through forecasting models, operational dashboards, and analytical work that shaped how leadership allocated resources and tracked performance.

Microsoft (Program Manager, Business Systems Analyst, Jul 2014 - Jan 2016)

- **Managed global data center resiliency programs**, overseeing infrastructure continuity planning across the full corporate enterprise.

EDUCATION AND CREDENTIALS

M.A. in Management | Seattle Pacific University | *June 2013 - June 2014*

B.A. in Psychology, Minor in Business | Seattle Pacific University | *Sept 2008 - June 2012*
